TABLE CONTENTS

Table	No.	Page	e No.
	Summary		3
1.	Federal order minimum Class I prices for milk of 3.5 percent butterfat content, f.o.b. market or other indicated point, and butterfat differentials, November		5
2.	Federal order minimum Class and blend prices for milk of 3.5 percent butterfat content, f.o.b. market or other indicated point, and butterfat differentials, October		6
3.	Federal order minimum Class and blend prices for milk of 3.5 percent butterfat content, f.o.b. market or other indicated point, January-October		8
4.	Number of producers delivering milk to handlers regulated under Federal orders, total deliveries, and average daily deliveries per producer, October		10
5.	Producer milk deliveries used in Class I and gross Class I sales by handlers regulated under Federal orders, October		12
6.	Producer milk deliveries to handlers regulated under Federal orders and deliveries used in Class I, January-October		14
7.	Federal milk order Class I formula price information, October		16
8.	Total fluid items, whole milk, skim milk items, milk and cream mixtures, and cream sold in marketing areas defined by Federal milk orders, for markets where such information is available, September, with comparisons		18
9.	Daily average sales of individual fluid milk products, selected Federal order markets, January 1970 to date, with comparisons		55
10.	Percentage of whole milk used in the production of manufactured dairy products, selected marketing areas defined by Federal milk orders, January 1970 to date, with comparisons		24
11.	Federal order base and excess prices for milk of 3.5 percent butterfat content, October		25
12.	Seasonal incentive fund included under various Federal milk orders, October		25
13.	Filled and imitation milk sales in Federal milk order markets, January 1970 to date, with comparisons		25
14	Dairy product prices and manufacturing milk prices used in Federal milk order pricing formulas, January 1970 to date, with comparisons		26
15.	U.S. milk prices, 3.5 percent butterfat basis, January 1970 to date, with comparisons		27
16.	Retail prices paid by consumers for dairy products, United States, January 1970 to date, with comparisons		28
17.	Prevailing prices paid by consumers for the most common grade of whole milk, 25 cities, November 1970, with comparisons		28
18.	U.S. production, January 1970 to date, with comparisons		29
19.	Commercial and Government storage holdings, January 1970 to date, with comparisons		29
20.	U.S.D.A. purchases (Delivery basis), January 1970 to date, with comparisons		29
	Lowfat milk sales in Federal milk order markets		31
21.	Sales of whole milk items, skim milk items, and lowfat milk (2% milk) as a percentage of total fluid mil sales in selected Federal milk order markets, July 1962, 1966, 1968, and 1970		32
	Major order actions, October		37

Minimum Prices. The weighted average Class I price paid by handlers regulated under 58 comparable Federal milk order markets for 3.5 percent milk in October 1970 was \$6.77 per hundredweight, 17 cents higher than the \$6.60 per hundredweight price in October 1969. (See table 2.) Class I prices announced for November 1970 with comparisons with November 1969 are shown on table 1.

Producers in the 58 markets received a weighted average blend price of \$6.30 per hundredweight for 3.5 percent milk in September 1970, 17 cents higher than the \$6.13 price received by producers in October 1969. Class prices, blend prices, and associated butterfat differentials, by markets, are reported on table 2.

The weighted average Class I price for the January-October 1970 period for the 58 markets was \$6.73, 25 cents higher than the \$6.48 price for the same period in 1969. The weighted average blend price for January-October 1970 was \$5.91, 21 cents higher than the blend price of \$5.70 reported for the same period in 1969. (See table 3.)

<u>Producer Deliveries.</u> A total of 135,045 producers delivered 4.9 billion pounds of milk to handlers in the 58 markets during October 1970. The Volume is 4.6 percent above producer deliveries in October 1969. Average daily delivery per producer increased from 1,106 pounds in October 1969, to 1,176 pounds in October of this year. Producer number, producer deliveries, average butterfat percentages, and average daily delivery per producer for individual markets are shown on table 4.

Producer deliveries during the first ten months of 1970 totaled 50.7 billion pounds in 58 markets, 3.7 percent above producer deliveries made during the same period in 1969. (See table 6.)

Producer Deliveries Used in Class I. The volume of producer deliveries used in Class I in 58 markets decreased 0.1 percent from last year, to a total of 3.4 billion pounds for October 1970. (See table 5.)

The volume of producer deliveries used in Class I during the first ten months of 1970 in 58 markets, totaled 31.0 billion pounds, 0.5 percent below such Class I use during the same period in 1969. (See table 6.)

<u>Percentage of Producer Deliveries Used in Class I.</u> The average Class I utilization percentage for 58 markets for October 1970 was 68 percent, four percent below that in October 1969. (See table 5.) The average utilization percentage in 58 markets for the first ten months of 1970 was 61 percent, compared to 64 percent for the first ten months of 1969. (See table 6.)

<u>Producer Deliveries Used in Other Than Class I.</u> The volume of producer deliveries used in other than Class I products in the 58 markets totaled 1.5 billion pounds in October 1970, 32 percent of producer deliveries. Table 10 shows for 61 markets where data were available, the percentage of whole milk equivalent used in manufactured products during the first eight months of 1970.

Filled and Imitation Milk Sales. Survey data of filled and imitation milk sales in Federal order markets are presented on table 13.

Fluid Milk Product Sales. Total in-area sales for October 1970 are estimated to be about 2.8 billion pounds, 0.8 percent above such sales in October of last year.

Total fluid in-area sales for September 1970 were 0.8 percent below sales for September 1969. This decrease was the result of decreases in the sales of whole milk items and mixtures of 2.7 percent and 9.2 percent, respectively, which were not offset by the 7.7 percent increase in the sales of skim and lowfat milk items and the 0.5 percent increase in the sales of cream items. Complete September in-area sales data for total fluid items, and the four major product groupings (whole milk, skim milk items, mixtures, and cream) are reported on table 8.

For the first nine months of 1970, total in-area sales of fluid milk items in Federal milk order markets where comparable data were available, were 0.4 percent below total fluid sales for the same period in 1969. Sales were up for many skim milk items, continuing a trend that started a few years ago. Sales of plain lowfat (2%) milk, and lowfat (2%) milk with solids added continued to show the largest increases, increasing 24.1 percent and 10.5 percent, respectively. Sales of all other fluid milk items, with the exception of flavored whole milk, and sour cream were down from the first nine months of the previous year. Whole milk sales were down 2.5 percent; sales of milk and cream mixtures were down 7.4 percent; and, sales of cream items were down 3.3 percent. Daily average sales of individual fluid milk products are shown on table 9.

Total fluid in-area sales; changes in sales and butterfat content of the four major fluid milk product groups and total fluid products

^{1/} Sales routes of handlers may extend outside defined marketing areas. In some cases, such handler in-area sales are partially estimated.

^{2/} Plain, flavored, and fluid equivalent of concentrated.
3/ Plain, fortified, and flavored skim and part skim milk, buttermilk and cultured specialties.

^{4/} Sales represent the area after the merger and expansion of Delaware Valley, Upper Chesapeake Bay, and Washington, D.C., August 1, 1970; and Tri-State, Cincinnati, Columbus, Miami Valley, and Northwestern Ohio, August 1, 1970.
5/ Sales represent the area after the 1969 amendment. (The May 1, 1969 amendment merged the Eastern Ohio-Western Pennsylvania Joseph Sales for marketing area as defined after the 1969 amendment.

7 Small amount of sales estimated.

of 1965. L/ Includes purchase of instant nonfat dry milk of 36,021 thousand pounds, January to date. 5/ Includes purchase of evaporated milk of 72 million pounds, January to date 1970 and 183 million pounds, January to date 1969.

Lowfat Milk Sales in Federal Milk Order Markets

Total fluid milk sales in Federal order markets are subdivided into four major product groups: Whole milk items, skim milk items, milk and cream mixtures, and cream items. Whole milk items (plain and flavored whole milk) and skim items (skim milk. lowfat milk, buttermilk, and flavored milk drinks) constitute about 98 percent of total fluid milk sales. Milk and cream mixtures, and cream items constitute only about two percent of total fluid sales.

Change in sales relationship and butterfat content of the four major fluid milk product groups and total fluid products,

1952-70 are summarized below:

^{1/} Includes flavored whole milk 1952-1956. 2/ Includes eggnog. 3/ January through August.

There has been a noticeable change in the sales relationship of whole milk and skim milk items (on a product pound basis) to previous year sales and to total fluid milk sales. Whole milk sales, compared to previous year sales, have decreased in each of the last five years. Whole milk sales, as a percentage of total fluid sales, have shown a decrease for each of the past thirteen years. In contrast, sales of skim milk items, compared to previous year, have shown large increases in each of the last eleven years, and now represent a larger proportion of total fluid sales than ever before.

Sales of milk and cream mixtures (on a product pound basis), compared to previous year sales, have shown decreases in each of the last eight years. Cream items sales, compared to previous year sales have shown decreases for the last eleven years. Sales of both milk and cream mixtures and cream items have shown declining trends as proportions of total fluid milk sales.

Since 1952, the butterfat contents of the four product groupings and total fluid items has changed. The butterfat content of the whole milk items has trended downward from 3.63 percent in 1952 to 3.46 percent in 1970. Between 1952 and 1966, the butterfat content of mixtures fluctuated between 11.7 and 11.9 percent. The butterfat content of mixtures began dropping in 1967 and in 1970 is only 11.3 percent. Cream items showed an increasing trend in butterfat content from 1952 to 1962, reaching a high of 23.6 percent. Since 1962, the butterfat content of cream items has decreased and is down to 22.0 percent in 1970. The butterfat content of skim milk items has trended upward since 1958 because an increasing proportion of such sales are lowfat items, however the fat content of all other fluid milk items have offset this increase and resulted in less and less butterfat being disposed of in fluid products.

Table 21.--Sales of whole milk items, skim milk items, and lowfat milk (2% milk) as a percentage of total fluid milk sales in selected Federal milk order markets, July 1962, 1966, 1968, and 1970

^{2/} Percentages based on total Class I sales.

^{3/} Data for February 1970.

^{4/} Restricted.

^{5/} Data represent the area after the 1969 amendment. (The July 1, 1968 amendment merged and expanded the Wheeling, Northeastern Ohio, and Youngstown-Warren markets and the May 1, 1969 amendment merged the Eastern Ohio-Western Pennsylvania and Clarksburg markets. Percentages for 1968 represent only the Northeastern Ohio area.)

^{6/} Dayton-Springfield until September 1, 1967.

^{7/} Less than 0.05 percent.

^{8/} Data represent the area after the 1969 amendment. (The July 1, 1968 amendment merged and expanded the Madison, Milwaukee, Northeastern Wisconsin, Northwestern Indiana, and Rock River Valley markets with the area formerly regulated under the Chicago order and the January 1, 1969 amendment deleted from the Chicago Regional marketing area, the area formerly regulated under Northwestern Indiana. Percentages for 1966 exclude the Chicago order which was not in effect during that year.)

^{9/} Data represent the area after the merger and expansion of Indianapolis, Fort Wayne, and the Northwestern Indiana market which was formerly included in the Chicago Regional marketing area, January 1, 1969.
10/ Suburban St. Louis until January 1, 1967.

Lowfat Milk Sales In Federal Milk Order Markets -Continued

From 1952 to 1970, the butterfat content of total fluid items decreased 0.78 pounds per hundredweight. If this years sales of fluid milk items by regulated handlers were to have the same butterfat content as in 1952, an additional 300 million pounds of butterfat would be disposed of through fluid product sales. The change in the consumption pattern, plus a change in product composition (decrease in the butterfat content of total fluid items) has made an increasing volume of butterfat available for manufacturing uses.

The increase in sales of skim milk items from January to August 1970, has not offset sales decreases in the other product groups, with the result that total fluid sales for the January-August 1970 period are slightly below sales for the same period in 1969. However the butterfat content of all fluid milk products in 1970 is estimated to be approximately 1.9 percent below that in 1969.

The growth in sales of skim milk items in individual markets for selected months, July 1962, 1966, 1968, and 1970 is shown on table 21. In July 1970, sales of skim milk items for 64 markets represented 20.0 percent of the total fluid sales in these markets. In 27 markets, sales of skim milk items comprised more than 25 percent of the markets' total fluid sales.

Much of the decrease in the sales of whole milk items and the increase in sales of skim milk items can be attributed to sales of lowfat products, ranging in butterfat content from 1.5 to 2.5 percent, and commonly referred to as "two-percent milk." Lower prices in some markets and weight consciousness on the part of some consumers are factors contributing to the increased use of lowfat milk.

Sales of lowfat milk in Federal order markets in July 1962 represented 2.3 percent of total fluid sales and 24 percent of total skim milk sales. In July 1970 sales of lowfat milk represented 12.6 percent of total fluid sales and 62.8 percent of total skim milk sales. In July 1970, 46 markets reported that sales of lowfat milk comprised over one-half of their total sales of all skim milk items, and in 17 of these markets such sales were more than 75 percent of their sales of skim milk items.

In some markets, increased sales of lowfat milk have resulted in large increases in the total sales of skim milk items, usually at the expense of whole milk items. In other markets, there has been a substitution of lowfat milk for plain and fortified skim milk with the result that sales of skim milk items have not shown large increases.

Table 21 shows, for 67 Federal order markets, sales of whole milk items, skim milk items, and two-percent milk, as a percentage of total fluid sales. The table also shows two-percent milk sales as a percentage of total sales of skim milk items.

Amendments:

Eastern Ohio-Western Pennsylvania - October 1 (35 FR 13774, 8/29/70). This amendment adds to the marketing area, the counties of Ashland (except Ruggles, Sullivan, and Troy townships) and Holmes; the remainder of Lake, Starke, and Wayne Counties; and the townships of Guilford, Harrisville, and Westfield in Medina County, all in the State of Ohio; the counties of Doddridge, Tucker, Tyler and Wetzel; the remainder of Barbour, Lewis, Preston, Randolph, Taylor, and Upshur Counties, all in the State of West Virginia. Population (1960 Census) 8,173,826.

Order revised to provide for three classes of utilization instead of two. Class I milk is all skim milk and butterfat disposed of in the form of a fluid milk product, and not accounted for as Class II or Class III milk. Class II milk is all skim milk and butterfat disposed of as fluid cream (including aerated cream and sterilized cream) or as mixtures of cream and milk or skim milk containing 10.5 percent or more butterfat, and in end-of-month packaged inventory. Class II milk includes all skim milk and butterfat used to produce yogurt, sour cream, sour cream products, cottage cheese, and cottage cheese curd, and disposed of in bulk to commercial food processors. Class III milk is all skim milk and butterfat used to produce frozen desserts and frozen dessert mixes, eggnog, frozen cream, butter, cheese (excluding cottage cheese and cottage cheese curd), evaporated and condensed milk (plain or sweetened), nonfat dry milk, dry whole milk, dry whey, condensed or dry buttermilk, any product containing 12 percent or more total milk solids, and sterilized products in hermetically sealed containers. Class III milk includes all skim milk and butterfat dumped or disposed of for livestock feed, in end-of-month bulk inventory, and in shrinkage.

The <u>Class II milk price</u> is the Minnesota-Wisconsin price for the month plus 10 cents. The <u>Class III milk price</u> is the lower of the Minnesota-Wisconsin price for the month or a <u>butter-powder formula price</u>. The Class II and Class III <u>butterfat differentials</u> are the Chicago 92-score butter price for the current month times 0.115.

This amendment incorporates a <u>seasonal incentive payment plan</u> (Louisville plan) into the order. The "take-out" months would be April through July, with a take-out rate per hundredweight of six percent of the average basic formula price for the preceding calendar year but not more than 25 cents. One-fourth of the total amount withheld would be paid producers in each of the "pay-back" months of September through December.

Rio Grande Valley - October 1 (35 FR 13826, 9/1/70). This amendment deletes provisions which provided for certain credits for specified Class II milk uses. Action also limits the <u>location adjustments</u> applied to the Class I price in determining the obligation of a pool plant for receipts from unregulated supply plants and in calculating the obligation of a partially regulated distributing plant. Amendment also provides that a <u>compensatory payment</u> will not apply to milk received from an unregulated plant if the milk is identified by specific assignment as milk previously received by the unregulated plant from a Federal order plant where it was classified as Class I.

Southeastern Florida, Tampa Bay, and Upper Florida - October 1 (35 FR 14699, 9/22/70). This amendment provides that a <u>producer-handler</u> may receive fluid milk products from pool plants or other order plants in an amount not to exceed the lesser of 5,000 pounds or five percent of his Class I sales during the month.

Action provides that a <u>compensatory payment</u> not be applied on receipts at a pool plant from an unregulated plant when classified as Class I, if the unregulated plant has received an equivalent volume of milk previously priced as Class I from a pool plant regulated by any order.

This action would allocate receipts at a pool plant from an unregulated plant which were initially derived from receipts of producer-handlers and exempt plants, or by reconstitution, in the same manner as if received directly at the pool plant. The obligation of the operator of a partially regulated plant for such receipts would be computed by using the same allocation procedure.

Amendment provides that the location adjustment credit on Class I milk received from an unregulated supply plant will not exceed the difference between the Class I and Class II

Major Order Actions, October 1970 -Continued

milk prices.

Amendment removes from the present Class II milk definition the phrase "and sterilized products in hermetically sealed containers." This would provide for all fluid milk products now in Class I to continue to be classified as Class I regardless of the form of processing or type of package.

Amendment removes from the Southeastern Florida order, the requirement that eight days' production be received at a pool plant in order for a dairy farmer to obtain producer status.

Suspensions:

- Middle Atlantic October 1 (35 FR 15287, 10/1/70). This suspension removes all limitations on milk diversions for the month of September 1970.
- Quad Cities-Dubuque October 1 (35 FR 15632, 10/6/70). This action suspends for October 1970, the location adjustment at plants located outside the marketing area.
- St. Louis-Ozarks October 1 (35 FR 15362, 10/2/70). This suspension removes for the period October through December 1970, the 27-cent location credit under the St. Louis-Ozarks order on Class I milk at supply plants located in the Missouri counties of Barry, Christian, Douglas, Greene, Howell, Laclede, Lawrence, Ozarks, Stone, Taney, Webster, Wright, and Texas.
